Recommendation of Ulf Aslak Jensen

I have known Ulf since he began his B.Sc. studies in Physics and Nanotechnology in 2010. In his first semester he took one of my courses, Mechanics and Physical Modeling. Ulf was a very active student contributing in lectures as well as in practicals and in the laboratory. In addition to his professional contributions I got a very good impression of Ulf as an engaged and well-liked student.

Based my impression of Ulf I have several times hired him as a teaching assistant, a job he held for two and a half year. As a teaching assistant he has performed very well to my full satisfaction. He has received very good feedback from the students he helped during his time as a teaching assistant. Ulf has continued the good start of his studies, and has obtained good grades in many of his courses and projects. After his very good B.Sc. dissertation he has changed focus in his studies, and has performed very well in his M.Sc. courses.

In conclusion I have come to know Ulf as a keen, bright student, very engaged in his studies, and I have no hesitation in giving him my recommendations.

Carsten Knudsen  
Senior Executive Education Officer  
Former Director of Undergraduate Studies in  
Physics and Nanotechnology
